Save Our Girls!

Today's girls 12-22 are under so much pressure: fractured families, foundations of society cracked with immorality, a media broken and depraved, peers struggling to find a way with no inner compass—today's girls need us! They need YOU!

Consider these statistics:

- One in three girls becomes pregnant before age 20.3.
- The median age at which young women have their first sexual experience is 17.4.
- CDC reports 48% of teens have had sex at least once (CWA.org).
- One in four will contract a STD (sexually transmitted disease) before age 18.
- Forty percent of girls at a contraceptive clinic are there without their parents' knowledge.
- One third of all teen pregnancies will end in an abortion.
- Nearly one-third of all juvenile arrests are girls, and one-third of all property crimes are perpetrated by girls.
- About one-quarter of all aggravated assaults are committed by girls.
- Girls are more likely to be violent at home, and the victim more than any other is her mother.
- Teenage girls are more likely to develop depression than teenage boys.
- Depression in girls might also extend to behaviors like cutting, anorexia, bulimia, and other self-destructive behaviors.
- Girls experiment with drugs and alcohol in higher numbers than boys.
